

Silly Paragraph Example

Prompt/Question: Should bananas wear clothes?

Claim: Bananas should wear clothes.

Thesis: Bananas should wear clothes because it's embarrassing when fruit is naked, peels don't count as clothing, and they would look stylish in the latest fashion trends.

Body Paragraph:

Bananas would look absolutely stunning if they wore clothing. The shape of a banana is particularly suited to wear the latest fashion trends. In a recent poll, 57% of bananas said they enjoyed looking online for the latest looks in fashion. This isn't surprising because the tapered end of a banana fits perfectly in a skinny jean but also looks great in a wider-leg pant. And the yellow peel tone of a ripe banana is complementary to a wide range of colors. Wearing clothing would be an easy way for a banana to express their inner style while looking hip in the fruit basket.
